

Fillable Form Caveat

I recently was informed that the “Fillable Form” does not work unless the user has a local mail application running on their PC, such as Outlook. Thus, your option if you use the fillable form, is to save it locally on your computer and then email it to me as an attachment. sglamont@comcast.net.

Also, there is a high probability that the form will not work on mobile devices, such as iPad, iPhone, and Android etc.

The plan is to develop an actual web form for next year.

Please do not hesitate to call me if you have any difficulty registering. (I don't care what time or day it is).
